STEM Maker Station

Make building and hands-on learning experiences readily available to your students with the STEM Maker Station—a mobile cart that stores essential maker materials in one secure place.

Key Features

Durable and Mobile

Its weight and mobility makes it ideally suited to K-12 level students. Perfect for mechanical and art-based classroom activities.

Extensive Storage

This station is designed to manage the storage of tools, materials, and tech devices. The large open storage rack, open tubs, and large bottom shelf are suitable for carrying a wide range of materials and negate the need for using multiple storage solutions.
